HELPFUL HINTS IN THE ART OF CHINA PAINTING.

With the Lacquer Tube Colors Many Chances of Failure Are Obviated—Detailed Directions For Painting a Photograph Frame—Gold Work.

The great variety of undecorated china imported and manufactured renders the art of china painting as fascinating an popular as ever. "With the tube colors known as lacquer many of the chances of failure are obviated. For simple ornament it is better to paint the decorated forms over the glaze." Thus writes a contributor to The Ladies' Home Journal, who also gives a few suggestions and illustrations which may be carried out in the mineral colors.

A maple leaf design offered is intended for a panel or photograph frame. If carried out in tones of green, yellow.

gray and brown, it will be found most satisfactory. The raised scrolls around the edge are touched up with gold, and the background is tinted a pale cream with ivory yellow. For the leaves various soft shades of green and yellow are employed. For the young leaves use apple green with a tinge of silver yellow and shade with chrome green and neutral gray. For the darker ones use brown and chrome greens qualified with brown 17 and ultramarine blue. Make the stems and seed pods of a light green accentuated with touches and veins of deeper color. To avoid monotony in the leaves, paint a wash of yellow brown over some of them. Take a soft shade of sage green, one in harmony with those used in the leaves, and stipple the receding ones until the color gradually merges into the creamy ground of the china.

An arrangement of meadow grass is also given. The motive of this subject is well suited to gold work, either on a mat ground in cream or some delicate color in transparent tint. This latter method, perhaps, is the less difficult of the two. The tint should first be applied over the surface, and after the design is drawn in it must be carefully erased wherever the gold is to be put on.

The outlines of the leaves, the veins and the prickly tassels are now indicated with paste for raised gold applied with a fine pointed brush. This process requires considerable experience to do it uniformly. The tassels and leaves that retire should not have any of the raised paste, but should be simply painted upon the surface of the plate in flat tones.

After being fired the work is ready to receive the gold. It must be fired
